

3M 8210 N95 Particulate Disposable Respirator

Description

3M™ Particulate Respirator 8210, N95 is a disposable particulate respirator that is designed to help provide reliable respiratory protection of at least 95 percent filtration efficiency against certain non-oil based particles. This respirator is designed for use with particles such as those from grinding, sanding, sweeping, sawing, bagging, or other dusty operations. The respirator incorporates 3M's proprietary technology with advanced electrostatically charged microfiber filter media designed for ease of breathing. This respirator is compatible with a variety of protective eye wear and hearing protection.

Features

- Two-strap design with welded dual point attachment helps provide a secure seal
- NIOSH approved for at least 95 percent filtration efficiency against certain non-oil based particles
- Lightweight construction
- Advanced Electrostatic Media is designed for ease of breathing
- Cushioning nose foam
- Collapse-resistant cup shape design

Specifications

- Filter Class : N95
- Product Type : Dust and Other Particles
- Protection Level : APF=10
- P-Series Filter : No

Application

- Construction and Heavy Infrastructure
- Mining, Oil and Gas
- General Manufacturing
- Transportation
- Food and Beverage Manufacturing
