

## AUWELD 601-200M-OX Piston O<sup>2</sup> Regulator

## **Description**

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The tested regulator is protected by a fully encapsulated filter. The zinc die-cast valve cover is protected by double-layer powder coating to ensure corrosion resistance in corrosive environments. The piston type regulator has a reliable piston design for precise gas control at high inlet and delivery pressure.

## **Specification**

Model	601-200M-OX
Cac	Ha/Ar/N12/02
Praecura Inlat Gauna	4500 PSI
May Nalivary Praesura	216 Rar
Warkina Praecura	0 - 200 Rar
Inlet Connection	CGA 580

## **Features**

• **Product Material**: Body and housing cap are machined from class "A" brass bar stock, sintered bronze inlet filter

- Characteristics: 2-1/2" gauges, piston stage construction, heavy duty, delivery high pressure flow, typical idea for high straight pressure, pressure transfer blanketing & high flow manifold
- **Applications**: It can apply to in industrial and laboratory applications, non-corrosive gases, hydrocarbon service.
