

AUWELD 601-70M-OX Piston O² Regulator

Description

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The tested regulator is protected by a fully encapsulated filter. The zinc die-cast valve cover is protected by double-layer powder coating to ensure corrosion resistance in corrosive environments. The piston type regulator has a reliable piston design for precise gas control at high inlet and delivery pressure.

Specification

Model	601-70M-OX
Gas	He/Ar/N ₂ /O ₂
Pressure Inlet Gauge	1500 PSI
Max Delivery Pressure	140 Bar
Working Pressure	0 – 70 Bar
Inlet Connection	CGA 580

Features

- **Product Material** : Body and housing cap are machined from class “A” brass bar stock, sintered bronze inlet filter

- **Characteristics** : 2-1/2" gauges, piston stage construction, heavy duty, delivery high pressure flow, typical idea for high straight pressure, pressure transfer blanketing & high flow manifold
- **Applications** : It can apply to in industrial and laboratory applications, non-corrosive gases, hydrocarbon service.
