

AUWELD 801-10M-OX 1 Stage S/S O² Regulator

Description

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The stainless steel regulator is a piston sensed single-stage high purity regulator designed for application where high pressure and low pressure are desired.

Specification

Model	801-10M-OX
Gas	He/Ar/N ² /O ²
Pressure Inlet Gauge	0-4500 PSI
Max. Delivery Pressure	250 PSI
Working Pressure	0-10 Bar
Inlet Connection	CGA 580

Features

- **Product Material** : Stainless Steel body
- **Characteristics** : Dual stage configuration, with safety relief valve for safe operation
- **Applications** : It can apply to research laboratories, gas chromatography, petrochemical Industry.
