

AUWELD CO² Heater Regulator 36V

Description

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The single stage regulator has design for designed for application requiring extremely high gas flow rate.

Specification

Model CO ² Heater Regulator	
Gas	CO ²
Outlet Flowmeter	0-25 Litre/ Min
Pressure Inlet Gauge	0-250 Bar
Pressure Outlet Pressure	3.5 Bar
Inlet Connection	CGA 580

Features

- **Product Material** : Body and housing cap are machined from class “A” brass bar stock, sintered bronze inlet filter, material of flowmeter tube is complex material which makes the products durable.
- **Characteristics** : 2” high pressure gauge, single stage construction, utilizing high pressure liquified CO² gas, provide stabilize CO² gas pressure & flow 36V, 110V & 220V, protect the gas from freezing
- **Applications** : It can use for CO² welding or MAG and also can apply to commercial, industrial and laboratory applications.
