

AUWELD Small CO² Heater Regulator 220V

Description

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The tested regulator is protected by a fully encapsulated filter. The single-stage regulator has a bottom inlet and an integrated pressure relief valve. The zinc die-cast valve cover is protected by double-layer powder coating to ensure corrosion resistance in corrosive environments.

Specification

Model	Small Heater CO ₂ Regulator
Gas	CO ₂
Heater Power	220V AC
Inlet Connection	GGA 580

Features

- **Product Material** : Body and housing cap are machined from class “A” brass bar stock, sintered bronze inlet filter
- **Characteristics** : Single stage construction, stem type seat assembly for more reliable performance, light to medium duty, suitable for Co2 flowmeter and regulator use

- **Applications** : It can apply to industrial and laboratory applications, non-corrosive gases, hydrocarbon service.
